

QUADCORPS

Carbon Emissions Statement - QuadCorps

At QuadCorps, we are committed to mitigating our environmental impact and taking responsible actions to reduce carbon emissions. We believe that sustainability is crucial for the well-being of our planet and future generations. As part of our dedication to environmental stewardship, we are pleased to share our carbon emissions initiatives and achievements.

Remote Working and Reduced Commuting:

We have embraced a 100% remote working setting, recognizing its potential to significantly minimize the need for daily commuting. By adopting remote work practices, we have effectively reduced carbon emissions associated with transportation. Our remote work policy enables our employees to work efficiently from the comfort of their homes, resulting in a substantial reduction in greenhouse gas emissions.

Promotion of Public Transport:

In addition to remote working, we actively encourage our employees to utilize public transport whenever possible. By choosing public transportation options such as buses, trains, trams, or shared rides, we further contribute to reducing our carbon footprint. Encouraging sustainable transportation alternatives helps us decrease our overall environmental impact while supporting greener commuting choices.

Vegan-Friendly Workplace:

We are proud to state that 25% of our workforce at QuadCorps follows a vegan lifestyle. By promoting and accommodating a vegan-friendly workplace, we are committed to reducing the environmental impact associated with animal agriculture. A plant-based diet has been shown to have lower carbon emissions and a significantly reduced ecological footprint, making it an effective way to combat climate change.

Digital Signing Process:

To minimize paper waste and support a more sustainable approach, we have implemented a digital signing process across our organization. By transitioning from traditional paper-based signing to electronic signatures, we eliminate the need for physical document printing and reduce paper consumption. This eco-friendly practice helps us conserve natural resources and reduce waste generation.

QuadCorps remains dedicated to continuously improving our sustainability efforts. We actively monitor our carbon emissions, explore innovative solutions, and set ambitious goals to further reduce our environmental impact. By embracing remote work, promoting public transport, accommodating vegan lifestyles, and implementing digital processes, we strive to contribute to a greener and more sustainable future.
